# 12. Melody generation with Markov chains Generative Music AI

#### What we'll build

MarkovChainMelodyGenerator

#### What we'll build

- MarkovChainMelodyGenerator
- States = (pitch, duration) = (E5, 1)

#### What we'll build

- MarkovChainMelodyGenerator
- States = (pitch, duration) = (E5, 1)
- Main methods:
  - o train
  - o generate

Tinker probabilities manually

- Tinker probabilities manually
- Train on melody dataset

- Tinker probabilities manually
- Train on melody dataset
- Different state encoding

- Tinker probabilities manually
- Train on melody dataset
- Different state encoding
- 2 Markov chains in parallel:
  - 1 for pitch / duration
  - 1 for dynamics

- Tinker probabilities manually
- Train on melody dataset
- Different state encoding
- 2 Markov chains in parallel:
  - 1 for pitch / duration
  - 1 for dynamics
- Markov chain for chord generation
